

IMPORTANT NOTICE

Waste Management's Inbound Recycling Quality Policy

We have been advised by Waste Management that the recycling industry including Waste Management is experiencing high levels of contamination which is **trash** in the recycling.

When non-recyclable items (contamination) end up in your recycling loads, they have the potential to turn the entire load into trash and increase processing costs resulting in contamination and/or additional service charges.

Please make every effort to make sure your recycling is free of contaminants and follow the recycling *do's* and *don'ts*.

RECYCLING <i>DO'S</i>	RECYCLING <i>DON'TS</i>
<i>Do</i> recycle all empty bottles, cans, paper and cardboard	<i>Don't</i> bag your recyclables. Plastic bags and film get tangled in the machinery.
<i>Do</i> keep foods and liquids OUT of recycling-RINSE CONTAINERS WELL	<i>Don't</i> include food soiled items-they can turn an entire load of recycling into trash
<i>Do</i> keep plastic bags OUT of recycling	<i>Don't</i> add sharp or dangerous materials like needles and electronics-they can cause injury to our workers
	<i>Don't</i> toss in "tangles" like rubber hoses and wires-they can shut down an entire recycling center!
	<i>Don't</i> include bulky items like propane tanks or construction debris
